

“The awards that Keystone Symposia provides really enable young scientists to ‘travel’ outside of their comfort zone, which I think is really good training. It was a great experience to present our science at the poster session and get feedback and comments from peers and key opinion leaders. I think that is very helpful when you are a young scientist.”

Eugenia Ong, PhD
Travel Award Recipient

KEYSTONE SYMPOSIA SCHOLARSHIPS

KS Scholarships provide students and post-doctoral fellows with funding to attend meetings at the forefront of biomedical research with academic, industry & clinical leaders.

Apply now for unique career-development & networking opportunities:

- Present your work side-by-side with field leaders, for expert feedback & novel perspectives that drive projects in new, fruitful directions.
- Career roundtables offer insights into diverse career trajectories.
- Forge lasting collaborations that will shape your research & career.
