

2025/2026 CORPORATE & FOUNDATION PARTNERSHIP OPPORTUNITIES

Keystone Symposia was founded on the philosophy that strategic alliances with academic and industry sectors spur scientific, technological and translational advances and innovations that ultimately achieve greater impacts on research, patient outcomes and society. As such, foundations and life science industry partners have always been invaluable to Keystone Symposia's mission and success. Investment in Keystone Symposia offers a unique opportunity to bridge cross-sector perspectives and promote collaboration, while prompting impactful change through groundbreaking research to address today's most pressing scientific, medical and global health challenges.

Gifts at \$25,000 and above provide vital, unrestricted support through our Director's Fund, fueling innovation across our entire scientific portfolio. These high-impact contributions often come from distinguished foundations and leading organizations in biotechnology, pharmaceutical and the broader life sciences. This support is essential to advancing biomedical sciences. It helps build transformative platforms that connect scientific influencers, thought leaders, and key decision-makers, driving program enrichment and fostering all generations of scientific leaders.

“

"Cutting-edge science and community building, which embody the Keystone Symposia brand, were instrumental in building my confidence as a scientist and making me realize that I am part of a larger engine of discovery."

- Shruti Naik, PhD, Associate Professor at Icahn School of Medicine at Mount Sinai | Keystone Symposia Scientific Advisory Board Member
