Scientific Organizers:
Robert D. Schreiber, Washington University School of Medicine, USA
James P. Allison, University of Texas MD Anderson Cancer Center, USA
Philip D. Greenberg, University of Washington, USA
Glenn Dranoff, Novartis Institutes for BioMedical Research, USA

Part of the Keystone Symposia Global Health Series, supported by the Bill & Melinda Gates Foundation

The fields of cancer immunology and immunotherapy continue to make great strides in providing both a comprehensive understanding of the basic mechanisms underlying tumor-immune system interactions and applying this knowledge to the development of effective immune-based cancer therapies. This Keystone Symposia meeting is organized to highlight recent insights into the complex roles of immune components and pathways in controlling or alternatively promoting cancer and to showcase recent uses of cancer vaccines, checkpoint blocking strategies, adoptive cell therapies and cellular engineering approaches, either as mono- or combinatorial therapies, that have resulted in durable, effective and safe therapeutic responses to an increasing number of cancer patients. Part of the meeting will also focus on new, developing technologies that are likely to expand our capacity to monitor the effects of cancer immunotherapy with a precision, refinement and at a level that has not been possible in the past.

Session Topics:
• Multimodal Approaches to Immunotherapy
• Immunosuppressive Cells in the Tumor Microenvironment
• Cancer Immunotherapy: Targeting Immune Checkpoints
• Cancer Immunotherapy: Combinatorial Approaches
• Cancer Immunotherapy: Cancer Vaccines that Work and Why
• Cancer Immunotherapy: Cellular Engineering
• Nex-Gen Technologies

Global Health Travel Award Application Deadline: October 18, 2016
Scholarship Application & Discounted Abstract Deadline: November 16, 2016
Abstract Deadline: December 19, 2016
Discounted Registration Deadline: January 18, 2017
SUNDAY, MARCH 19
Arrival and Registration

MONDAY, MARCH 20
Welcome and Keynote Session
*Robert D. Schreiber, Washington University School of Medicine, USA
Glenn Dranoff, Novartis Institutes for BioMedical Research, USA
Mechanisms of Protective Tumor Immunity
Andreas G. Plückthun, University of Zürich, Switzerland
Future Biologics: Exploiting the Opportunities for Protein Engineering

Multimodal Approaches to Immunotherapy
*James P. Allison, University of Texas MD Anderson Cancer Center, USA
Immune Blockade in Cancer Therapy: New Insights and Opportunities
Padmanee Sharma, University of Texas MD Anderson Cancer Center, USA
From the Clinic to the Lab: Investigating Immune Responses to Immunocompote Therapies
Nicholas P. Restifo, NCI, National Institutes of Health, USA
Genome-Scale CRISPR-Cas9 Screen Identifies Genes Essential for T Cell-Based Cancer Therapies

Workshop 1: Neoantigens, Vaccines and Responses
Nicholas K. Akers, Icahn School of Medicine at Mount Sinai, USA
Modeling Tumor Immuno-Dynamics to Predict Patient Survival & Immunotherapy Efficacy
Govinda Sharma, BC Cancer Agency, Canada
A Novel High-Throughput Screening Approach for the Detection of Cytotoxic T-Cell Receptor Epitopes
Sanja Stevanovic, NCI, National Institutes of Health, USA
Landscape of Immuneogenic Tumor Antigens in Successful Immunotherapy of Virally-Induced Epithelial Cancer
Alice Tzeng, Cleveland Clinic Lerner College of Medicine, USA
Temporally Programmed CD8alpha+ DC Activation Enhances Combination Cancer Immunotherapy
Aileen Li, Harvard University, USA
Mesoporous Silica (MPS) Vaccine to Enhance Anti-Tumor Immunity
*Jay A. Berzofsky, NCI, National Institutes of Health, USA
Translation of Cancer Vaccines from Mice to Human Clinical Trials

Immunosuppressive Cells in the Tumor Microenvironment
*Glenn Dranoff, Novartis Institutes for BioMedical Research, USA
Alexander Y. Rudensky, HHMI/Memorial Sloan Kettering Cancer Center, USA
Tregs in Cancer Immunity
Vincenzo Bronte, University of Verona, Italy
Role of Myeloid-Derived Suppressor Cells in Tumor Immunity

Global Health Travel Award Deadline: October 18, 2016 / Abstract & Scholarship Deadline: November 16, 2016 / Abstract Deadline: December 19, 2016 / Discounted Registration Deadline: January 18, 2017

Radiotherapy Needs to Go Viral to Increase Responses to Checkpoint Inhibitors

Antoni Ribas, University of California, Los Angeles, USA
Overcoming Resistance to PD-1 Blockade Therapy

Alyssa K. Kosmides, Johns Hopkins University, USA
Short Talk: Immunoswitch Particles: A New Approach to Cancer Immunotherapy

**Poster Session 2**

**WEDNESDAY, MARCH 22**

**Cancer Immunotherapy: Cancer Vaccines that Work and Why**
*Elizabeth M. Jaffee*, Johns Hopkins University, USA
Vaccine-Based Combinatorial Immunotherapy Can Convert Pancreatic Cancers into Immunologic Diseases

**Cornelia L. Trimble**, Johns Hopkins University School of Medicine, USA
High-Dimensional Analyses of the Mucosal Microenvironment in Precancerous, Intraepithelial Cervical HPV Disease

**Catherine Ju-Ying Wu**, Dana-Farber Cancer Institute, USA
Developing and Improving Personalized Neoantigen-Targeting Cancer Vaccines

**Ugur Sahin**, TRON – Translationale Oncology, Germany
Individualizing Cancer Treatment by mRNA Therapies

**Danielle M. Lussier**, Washington University in St. Louis, USA
Short Talk: Subclinical Irradiation-Induced Neoantigens Enhance Immunotherapy of Cancers with Low Mutational Loads

**Amanda Lulu**, University of Virginia, USA
Short Talk: Pre-Existing Immune Memory in Healthy Donors to Cancer-Associated Phosphopeptides

**Inflammation and the Tumor Microenvironment**
*Michael Karin*, University of California, San Diego, USA
Immune Regulation of Liver Cancer: Chronic Hepatitis Promotes HCC Development by Dismantling Cancer Immunosurveillance

**Shannon J. Turley**, Genentech, Inc., USA
Leukocyte Function and Positioning in Diverse Stromal Niches

**Thomas Gajewski**, University of Chicago, USA
Tumor-Intrinsic Mediators of T Cell-Inflamed Versus Non-Inflamed Tumor Microenvironment

**Evon W. Newell**, Singapore Immunology Network, SigN, Singapore
Short Talk: Deep Profiling of Human Hepatocellular Carcinoma Immune Infiltrates: Involvement of CD103+ Resident Memory-Like T and NK Cells

**Poster Session 3**

**THURSDAY, MARCH 23**

**Cancer Immunotherapy: Cellular Engineering**
*Philip D. Greenberg*, University of Washington, USA
Adaptive T Cell Therapy with TCR-Engineered T Cells

**Michel Sadelain**, Memorial Sloan Kettering Cancer Center, USA
Targeting CARs to the TRAC Locus Enhances T Cell Potency

**Cancer Immunotherapy: Cellular Engineering**

**THURSDAY, MARCH 23**

**Cancer Immunotherapy: Cellular Engineering**
*Philip D. Greenberg*, University of Washington, USA
Adaptive T Cell Therapy with TCR-Engineered T Cells

**Michel Sadelain**, Memorial Sloan Kettering Cancer Center, USA
Targeting CARs to the TRAC Locus Enhances T Cell Potency

**Poster Session 4**

**FRIDAY, MARCH 24**

**Meeting Wrap-Up: Outcomes and Future Directions (Organizers)**

**Nex-Gen Technologies**

**Darrell J. Irvine**, Massachusetts Institute of Technology, USA
Combining Lymph Node Targeting Cancer Vaccines with Systemic Immunotherapy to Recruit an Innate and Adaptive Attack Against Established Tumors

*Lisa M. Coussens*, Oregon Health & Science University, USA
Monitoring Inflammation in Cancer by Multi-Plex in situ Imaging

**Jim R. Heath**, California Institute of Technology, USA
Micro- and Nanotechnologies for Personalizing Cancer Immunotherapy

**Global Health Travel Award Deadline: October 18, 2016 / Abstract & Scholarship Deadline: November 16, 2016 / Abstract Deadline: December 19, 2016 / Discounted Registration Deadline: January 18, 2017**
