Why Attend a Keystone Symposia Conference?

Keystone Symposia conferences are renowned for their:
- Relatively small number of attendees and collegial atmosphere
- Strong multi-disciplinary component, in terms of both attendees and topics
- Relaxed, retreat-like environments conducive to discussion, collaboration and networking
- High-quality scientific talks and presentation of unpublished data
- New conference topics, including ones at the early stages of research
- Opportunities to present posters and short talks
- Mentoring activities for early-career investigators

Call for Scholarship Applications and Abstracts!

We encourage all graduate students and postdoctoral fellows to apply for a scholarship to attend one of our 2019-2020 conferences. Applications require abstract submission and mentor verification of one’s student or postdoc status. Up to $1,200 of expenses will be reimbursed based on eligible receipts. Be sure to apply by the first posted abstract deadline, which is approximately four months in advance of the conference.

All abstracts submitted by the first and second posted abstract deadlines will also be considered by the scientific organizers for short talks on the conference program. Presenting during a poster session and possibly on the program represent excellent opportunities to showcase, and gain valuable feedback on, one’s work.

View up-to-date program details for each conference at www.keystonesymposia.org followed by a /20 & the alpha-numeric program code (e.g., www.keystonesymposia/20A1). Conferences typically begin with afternoon registration and an evening welcome mixer on the first advertised day and conclude with an evening plenary session followed by food and entertainment on the last advertised day. However, some program formats vary, so please check the conference webpage.

All conferences are subject to possible change.
